

SCALAR ENERGY HEALING

(A Book Preview)

Prof. Dr. Romerlito C. Macalinao (2008)

INTRODUCTION

With eyes wide open, incredibly amazed, people blurted out: "So, how many thousands of dollars does this pendant cost? How did that happen? What is this pendant made of?" I heard those questions several times from different people at the **Professional Golfers Association of America** merchandise show in Orlando, Florida last January 2008. Typically I answer back, saying that this pendant is made of volcanic lava and it resonates with scalar energy. I explain further about the science and technology undergirding the pendant. At the end, I see a good number of people leave happily bearing with them an energy-revitalizing pendant, bracelet, flask or watch that resonate with scalar energy.

I have personally seen with my own eyes this kind of situation repeatedly, innumerable and globally. People see the scalar energy products, experience the demonstration, inquire about the science and technology of scalar energy and eventually respond positive. I have witnessed this response with those whom I have shared these items with. From athletes, to skeptics, individuals who have hypertension, diabetes, cancer, stroke, Parkinson's disease, muscular dystrophy, migraine, and allergies and a whole lot more, the feedback is amazingly nothing short of the miraculous.

I write this book for all the people who passionately proclaim the healing benefits of scalar energy products. My intention here is to provide a rational, simple and useful information about the science concerning scalar energy healing. While the utilization of scalar energy is new in the field of health and wholeness, it is a growing interest among people who are discovering medical hope through alternative modalities. People are simply excited to tell their positive experiences with scalar energy. Young or old, sickly or healthy, the stories continue to multiply.

The Need For Scalar Energy Healing

We have sufficient reasons for scalar energy healing. The world suffers from electromagnetic contamination. The widespread use of technology that radiates EMF (Electro-Magnetic Frequency) and ELF (Extremely Low Frequency) constantly bombards the human body affecting its biofield. This fact of electronic pollution is addressed by the "**BioInitiative Report: A Rationale for A Biologically-based Public Exposure Standard for Electromagnetic Fields (ELF and RF).**" Fourteen scientists, public health and public policy experts documented the scientific evidence on health impacts of exposure to electromagnetic fields.

Diseases due to excessive exposure to EMF are the following: child leukemia and brain tumor; adult brain tumors, acoustic neuromas, and breast cancer; diseases of the nervous system such as Alzheimer's disease, motor neuron disease and Parkinson's disease; effects on the DNA, damage causes mutation and initiating cancer; effects on stress proteins, relentless onslaught of ELF and RF weakens the stress proteins; effects on the immune system, chronic provocation by exposure to ELF and RF can lead to immune dysfunction, chronic allergic responses, inflammatory diseases and ill health.

The **World Health Organization** declared that our electricity, power supply and all appliances using electricity are the main sources of ELF fields; computer screens, anti-theft devices and security systems are the main sources of intermediate frequency fields; and radio, television, radar and cellular telephone antenna, and microwave ovens are the main sources of radio frequency (RF) fields. These fields induce currents within the human body, which if sufficient can produce a range of effects such as heating

and electrical shock, depending on their amplitude and frequency range. Mobile telephones, television and radio transmitters and radar produce RF fields. These fields are used to transmit information over long distances and form the basis of telecommunications as well as radio and television broadcasting all over the world. Microwaves are RF fields at high frequencies in the GHz range. While the body already ages, lacks exercise and proper diet, the e-smog intensifies vulnerability to all kinds of sickness and disease. Scalar energy protects the body from e-smog and strengthens the human biofield to facilitate health and healing.

First, What Is Scalar Energy?

Simply put, scalar energy is a result of the **convergence** of two identical electromagnetic waves or frequencies that come from two opposite directions. A **cancellation** of the free movement of these identical waves takes place, making these waves stationary. A **concentration** of energy resonates from the coupling of two electromagnetic frequencies. It is also called electromagnetic wave coupling. Both scalar wave and electromagnetic wave can be man-made and natural. Both are a part of a larger spectrum called the electromagnetic field.

Scalar waves are present in the environment, just as electro-magnetic waves are. Thus packets of scalar energy are present everywhere, only hidden from the naked eye. Once these identical solitary waves meet, they interlock and wrap around each other like a couple. Prior to the coupling, these waves were **transversal waves** or hertzian, projecting in a straight line in space. After the coupling, these waves become **longitudinal waves** or teslar, pulsating in place occupying space. Synergy takes place, producing a stronger and more powerful wave that stays in one place; hence, a standing wave.

Interestingly, the food we eat also emit frequencies. Consuming food of higher frequencies create an environment that prevent disease, bacteria, virus, fungus, cancer, etc. The human body also generates different frequencies. The normal healthy frequency ranges from 62-72 Hz. Diseases appear when the frequency drops: 58 Hz cold and flu, 42 Hz Cancer. In fact, every object in the planet has a frequency of its own that can be accurately measured. Scalar energy resonates with the human body the necessary healing frequencies it needs.

Who discovered Scalar Energy?

James Clerk Maxwell (1831-1879), Heinrich Rudolf Hertz (1857-1894), Nicola Tesla (1856-1943), Albert Einstein (1879-1955), and Andrija Puharich (1918-1995) are giants of science whose life spanned two centuries apart. They all have one thing in common, preoccupation with energy. Francis Everitt of **Stanford University** states that Maxwell unraveled to humanity the great storehouse of power, the electromagnetic spectrum. Maxwell developed a unified theory that combined electric, magnetic and light. In the course of his work, he presented a groundbreaking equation that showed the existence of scalar energy. Maxwell having established that electromagnetism traveled in the speed of light, Hertz advanced this further by fabricating an electrical apparatus that measured electromagnetic propagation – the first radio wave transmitter. Thus, in honor of his achievement, Hertz (Hz) became the unit of frequency. Both Maxwell and Hertz stumbled upon this mysterious wave, but Einstein likewise had the same reaction. Referring to this wave as a **subtle energy** that could not be measured, he concentrated more on energy fission.

Nikola Tesla, a colleague of Einstein, pursued the research on scalar waves. It was while working with Thomas Edison, the discoverer of direct current electricity, that Tesla rediscovered this mystical but powerful wave. Experimenting from the work of Hertz, Tesla saw a new form of energy come through some violently abrupt direct current electrical charges. As of 1904, Tesla had developed transmitters to harness scalar energy from one transmitter to another. Tesla pioneered energy fussion and attempted to provide free electricity by harnessing natural scalar energy from the core of the earth. The alternating current electricity showcased by the first hydroelectric Niagara Falls Power Plant in New York is one of Tesla's greatest achievements.

Andrija Puharich blankets the horizon with the dawn of the 21st century. He picked up where Tesla left off. He discovered that scalar waves were Extremely Low Frequency non-hertzian EMF. He concluded that scalar waves could have harmful or beneficial effect on both people and the environment. A popular invention of Puharich and his colleagues is the **Teslar Watch** (a tribute to Tesla) that resonates with artificial scalar energy. A scalar energy chip underneath the base of the watch oscillates between 7 to 9 hertz - right around the earth's natural 7.83 hertz frequency (as measured by scientists at UC-Berkeley's Seismology Laboratory), shielding the wearer from harmful EMF and ELF and providing the human body a relax, calm and creative state of mind.

How Does Scalar Energy Work with the Human Body?

It stands as an established fact of science that the human body pulsates with electromagnetic energy, a biofield. The U.S. National Institutes of Health coined the term **biofield** and has been accepted by the U.S. National Library of Medicine as a medical subject-heading search. Biofield therapies include Reiki, Therapeutic Touch, external qi healing and other subtle energy interactions. This electromagnetic energy is inherent at the cellular level. As a biological system, the human body responds to subtle energies and functions at the quantum level. The human biofield is revitalized when exposed to scalar energy. This is attested to by scientific measurements of the biofield.

The biofield can be measured electrically, (electrocardiogram, electroencephalogram), magnetically (magnetocardiogram, magnetoencephalogram), acoustically (crystallography, lithography), thermally (photometry, thermograph imagery, spectroscopy), Kirlian photography and the gas discharge visualization machine. The latter was developed by *Dr. William Tiller* and his associates from **Stanford University**.

Physiotherapists also attest to the strength and stamina of athletes who utilize scalar energy. This is not without championship example. Using the diagnostic tests of Applied Kinesiology, people immediately experience the effect of scalar energy. This is done by applying pressure to a person's muscles and the responses serve as a primary feedback to the person's energy level. The presence of scalar energy can also be observed through double blind tests.

The United States of America, like other countries today, has the **National Center for Complementary and Alternative Medicine** that use some form of subtle energy healing to ensure a healthy life. Research on subtle energies, standing waves or scalar energy continues. Subtle energy healing paraphernalia swarms the market. The need for complementary, alternative and holistic therapy is becoming in-demand. Scalar energy healing is responding to this need.

What Is the Mechanism of Scalar Energy Healing?

It has been established from *in vitro* studies that scalar energy operates at the cellular level. It has been witnessed from countless *in vivo* testimonials the health-giving potentials of scalar energy. The physical effect of scalar energy can be easily felt by what it does to the biofield of any person plus the blood, brain, cells and the water we drink.

SCALAR ENERGY REINFORCES THE BIOFIELD. Attesting to this fact is the *Professor Beverly Rubik*, PhD in biophysics (1979) from the **University of California** at Berkeley. The biofield of every person may be conceived of as a very complex dynamic standing wave. When an EM radiating supplement or object is brought near to or inside the body, the biofield interacts, absorbing and enhancing the person's biofield. Thus, persons with medical condition instantly acknowledge a sudden burst of energy and vitality when drawn to a subtle energy source. The once weak biofield is raised to an optimum capacity.

SCALAR ENERGY UNCLUMPS THE BLOOD. *Dr. Siva Poobalasingam*, M.D., a pioneer in integrated health care in Malaysia, the director of integrative medicine in the **Amrita Integrated Health Center** and author of the book "Optimum Energy For Peak Performance: With Scalar Energy," documents

the health benefits of scalar energy. He states that blood responds to scalar energy by thinning it out, preventing it from clumping. The clumping of the blood is indicative of disease. Every cell in the body gets its nutrients from the blood. When the blood is clumped, it overworks the heart from pumping blood through the arteries, capillaries, and veins that provide oxygen and nutrients to every cell of the body. The blood also carries away waste products.

SCALAR ENERGY SHARPENS BRAIN FUNCTION. *Jon Barron*, author of "Lessons from the Miracle Doctors," world-leading nutraceutical researcher, cutting-edge formulary consultant, Director of **The Baseline of Health Foundation**, Health Sciences Institute Board Member, editor, publisher, and lecturer advocates scalar enhanced products for good health. He states that the function of the brain is all the more enhanced. Results of EEG tests show improved mental focus of people exposed to scalar energy as demonstrated by increased amplitude of EEG frequencies. Scalar energy works as an antidepressant as it inhibits the uptake of noradrenaline by PC12 nerve cells.

SCALAR ENERGY ENSURES CELLULAR STABILITY. Jon Barron mentions that the energy level of every single cell in the body is raised to the ideal 70-90 millivolt range. This increases the energy bonding of every single hydrogen atom in the body, thus protecting the DNA from damage. Improves cell wall permeability thus facilitating cell nutrition and cell detoxification into each and every cell. Strengthens the overall body energy levels as a result of increasing cellular energy for trillions of cells. Reinforces immune function by as much as 149% as proven in laboratory studies. Consequently, healthy cells prevent cancer.

SCALAR ENERGY TURNS DEAD WATER INTO LIVING WATER. *Dr. Masaru Emoto*, a world-renowned water scientist, a major proponent of the UN International Decade for Action, "Water for Life" 2005 to 2015, and prolific author, declares the healing properties of water when exposed to scalar energy. The water molecules become structured, micro-clustered and produced lovely images of hexagonal crystals. This kind of water, when consumed, restores the alkaline/acid balance of the body to its optimal level. People with diabetes and those needing detoxification benefit from this. Bathing with scalar-charged water has also been proven to reduce inflammation, hasten the healing of open wounds & promote healthy and good-looking skin. This water ensures health and healing, whether you bathe with it or drink it.

The ideas, procedures and suggestions contained in this book preview are not intended as a substitute for consulting with your physician. All matters regarding your health require medical supervision. The author is not liable or responsible for any loss or damage allegedly arising from any information or suggestion herein. The author does not have any control over and does not assume any responsibility for errors, or for changes made by sources referred to in this book preview.

Watch for the launching of the full version of "Scalar Energy Healing" this coming January.
